## **Introduction:**

In response to the challenges faced in providing powdered milk to infants in the underserved regions of Sistan and Baluchistan, a concerted effort was undertaken to ensure the equitable distribution of this essential resource. This report outlines the process and stages of distributing powdered milk to needy families in the province.

## **Challenges Faced:**

The rationing of powdered milk, coupled with the requirement for identity papers, posed significant hurdles in ensuring its availability to infants in deprived areas. In light of these challenges, requests were made from health centers for the procurement of powdered milk to address the pressing needs of the community.

## **Distribution Process:**

A total of 660 cans of powdered milk, valued at \$2,500 (520,461,000 Rials), were procured and distributed in three stages (please refer to the Appendix for a copy of the receipt). Each baby was given three cans of powdered milk. The distribution process was facilitated through trusted local connections, ensuring efficient and transparent allocation.

## **Functional Stages:**

The functional stages represent strategic milestones in the systematic distribution of essential powdered milk to underserved communities, ensuring efficient coverage across various areas of need.

Table 1 Overview of the distribution stages, including the respective dates and locations covered, along with the areas served in each stage.

Stage	Date	Location	Areas Covered
First	December 2023	Iranshahr Abtar Health Area	Abtar, Ketokan, Saraidan, Tookar, Kaliran villages, Gandamakan neighborhood, selected areas of Iranshahr
Second	February 2024	Comprehensive Health Center of Shahrdras	Shahrdras, Rasul Abad, Baghdaniyeh, Rahman Abad villages
Third	March 2024	Neskand Comprehensive Health Center	Sarbaz and Champ Nikshahr cities
